EDUCATION

North Carolina State University

Master of Computer Science

Raleigh, NC

Aug. 2025 - Present

- **Coursework:** Software Engineering, Robotics, Operating Systems Fundamentals

University of North Carolina at Chapel Hill

Bachelor of Science in Computer Science, Minor in Chinese

Chapel Hill, NC

Aug. 2022 – May 2025

- **Coursework:** Algorithms, Data Structures, Databases, Models of Languages and Computation, Computer Organization, Computer Vision, Numerical Analysis

TECHNICAL SKILLS

Languages: Python, Rust, C/C++, JavaScript, HTML/CSS, SQLite

Frameworks/Libraries: React, Node.js, Vite, FastAPI, NumPy, Matplotlib, OpenCV, Langchain

Developer Tools: Linux, Neovim, Git, VS Code

EXPERIENCE

Product Developer

Sep. 2023 – Present

CircuitSays

Raleigh, NC

- Developed a **React-based** companion web app for physical electronics kits, improving user engagement and product usability, leading to **10 new client schools** beginning the grant process to acquire our electronics kits as well as **over \$20,000** in standalone grants.
- Assisted in the design and development of physical kits to teach circuit fundamentals, enhancing learning outcomes through hands-on educational tools.
- Implemented a testing suite with **80% code coverage** to ensure a reliable and professional-grade application for our educational clients.
- Collaborated with potential clients to gather feedback, using insights from the app to demonstrate product value and improve product-market fit.

Residential Life Assistant

Aug. 2021 – May 2022

North Carolina School of Science and Math

Durham, NC

- Supported students in adjusting to on-campus living, increasing overall student satisfaction by through conflict resolution, community-building events, and fostering a safe residential environment.

PROJECTS

CalculateTripCost - Driving Expense Tracker | *React, FastAPI, PostgreSQL, Tailwind CSS, Chart.js*

- Engineered a full-stack web application with **React frontend** and **FastAPI backend** to track and analyze driving expenses with real-time cost calculations.
- Integrated with the **U.S. Energy Information Administration API** to fetch current gas prices by state and implement automatic price caching.
- Designed and implemented a **PostgreSQL database schema** with optimized queries for statistical analysis and monthly reporting.
- Developed interactive data visualizations using **Chart.js** to display driving statistics, cost breakdowns, and monthly trends.
- Built a responsive UI with **Tailwind CSS** featuring modern design patterns and seamless mobile/desktop compatibility.

Systems Literature Analysis Engine | *Python, Langchain, Git, Vensim, Kumu, Kaggle*

- Developed an LLM pipeline to analyze research papers and identify variable relationships with a **70%** correctness rate.
- Built integration tools to automatically convert between **Vensim** diagrams, **JSON**, and **Kumu**-compatible visualizations, eliminating manual processes.
- Led a Kaggle hackathon for **8 participants** that generated **5 innovative prompt solutions**, outperforming our original approach.
- Presented the project to **50+ attendees** at a university research symposium and **50+ attendees** at the AI@UNC I/O symposium.
